According to him, the State government led by His Excellency Dr. Peter Ndubisi Mba, with his progressive administration, is committed to creating an enabling environment to support entrepreneurs through investment. He said that Enugu State's economic indicators are promising, with remarkable growth in small and medium scale enterprises and increased capital investment from both local and international investors, involving investors' confidence in the management of Enugu State economy by the present administration.

Dr. Ogbu-Nwobodo further stated that it was through government efforts that diverse business opportunities were established. He also said that when the Governor came into office, he signed the Executive Order NO 3, which gave rise to economic growth through investment based on Ease of Doing Business, transparency, creditability, and accountability. Again, he said that different MDAs have been mandated, especially the business enabling MDAs, to create and publish their Service Level Agreement so as to avoid hidden charges or unclear regulatory processes.

In his words, "As a result, today, I am bold to stand before you to reaffirm this administrative commitment to fostering a business-friendly environment where every entrepreneur, both local and foreign, can thrive with confidence and creditability." He further said that he has heard about the numerous projects and he is on the side of receiving moribund industries and State enterprises. And therefore, he believed that the State is missing one of the key legacies of its founding fathers, which is the Niger Gas Plant in Emene, and he went further to say, in assurance, that the Plant will become operational by the end of January 2025.
